: Reproducibility Hackathon

when:

04.05.23, 14.00-16.30

05.05.23, 10.15-18.00

where:

Vetsuisse Faculty, Bern
Längassstrasse 122
HS Paraklinik

RN CH Swiss Reproducibility Network

HACKATHON

what:

Thursday: info and training: Introductory lecture on reproducibility, pre-registration and open data. Refresher course on mixed effect regression models (GLMM).

Friday: whole day hackathon: based on the pre-registration protocols and published data we will try to reproduce as many analyses from pre-registered bio-medical research papers as possible. Knowledge of one statistical analysis environment (e.g. R, SAS, SPSS, stata, NCSS, or any other..) is required and basic knowledge of simple mixed effect regression models (GLMM) is advantageous. Bring your own laptop with your preferred statistical software installed. Coffee, cake, drinks and pizza will be provided.
